

ACS Chemical Technology Student Recognition Award *2006-2007 Report*

The ACS Chemical Technology Student Recognition Award Program has honored 179 graduates from 21 programs since it was established by the ACS Committee on Technician Affairs in the fall of 2004. The program is designed to help highlight the wide range of skills and accomplishments of graduates to potential employers.

The following students were selected by committees at each institution. Recipients are outstanding upper-level chemical technology students who demonstrate a high level of performance in the laboratory and the classroom, excellent oral and written communication skills, integrity, and reliability.
